

Here's what elementary teachers had to say:

“The resources are very engaging and easy to use.”

“My students loved the articles...I felt like writing finally made sense to them...I also love that the language standards are incorporated and integrated with writing.”

“I appreciated the flow of the lessons.”

“I love the ‘mentor texts.’”

“This resource is wonderful and effective.”

“We have begun using the program. We started with Narrative Fiction, Lesson 1. The kids are loving it- and so am I. I cannot tell you how valuable the model texts are. I am not a great writer, and I certainly can't write every genre well. In order to teach kids how to write, you need great examples and that is what the model texts offer. It is also nice to have a focus skill with each lesson (for example, we had idioms with that Lesson 1) and then could use the model text to again refer to those skills in action. Thanks for giving us the opportunity to pilot the program- we are looking forward to continuing with it and making it part of our daily routine.”
